

tridak® Filling Equipment

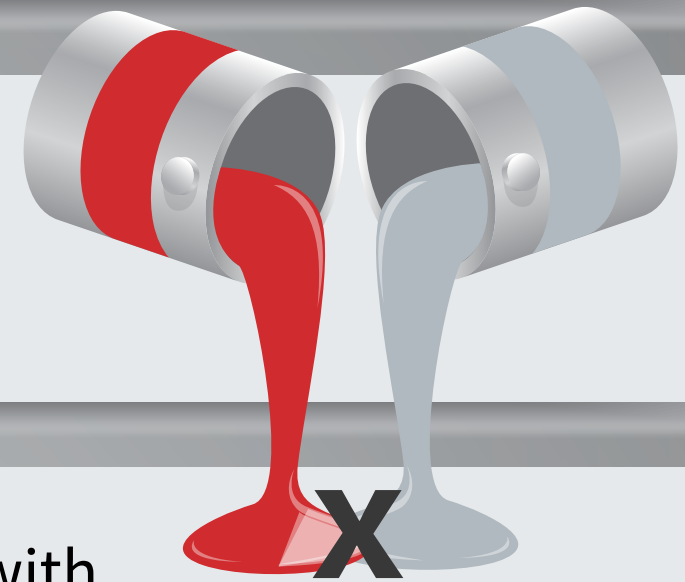

Model: 2200 Cartridge Filling System

SYSTEM FEATURES:

Fills single- and dual-component cartridges and syringes one side at a time to prevent cross contamination

Utilizes disposable fluid path valve technology which eliminates cross-contamination and minimizes cleanup and downtime during product changeover

OFF

All pneumatic operation with automatic fill and shutoff

Bottom-up, void-free filling

Adjustable fill speed and fill level with consistent accuracy

Swing valve assures clean material shut-off and easy access for cleaning

Compatible with 5, 10, or 15 gallon reservoirs and can be adapted for feeding from a drum

Low cost 5, 10, or 15 gallon quick change polypropylene reservoir insert system that can be treated as permanent containers, or alternatively, can be easily removed to store materials in a safe, economic manner

Tridak® specializes in the manufacture of bench-top and semi-automated systems for filling cartridges and syringes. Our filling systems are easy to use and cost effective – offering quick, repeatable filling, and years of trouble-free service.
