

Tridak® Filling Equipment

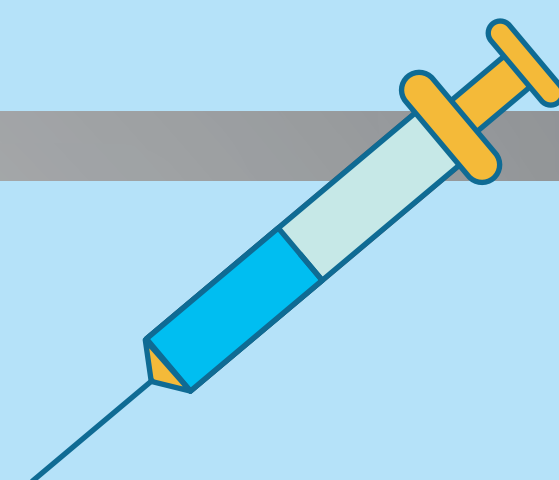

Model: **1060 Syringe and Cartridge System**

SYSTEM FEATURES:

Utilizes disposable fluid path valve technology which minimizes cross-contamination, cleanup, and downtime during product changeover

Dispensing valve features adjustable suck-back for a clean dispense of stringy and tacky materials

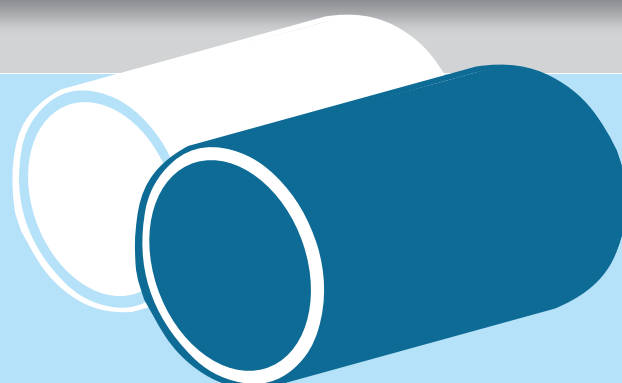

An adjustable pneumatic stop assures accurate fills

System fills 30-900 mL syringes or cartridges with pre-inserted pistons; tooling nozzles are available for a variety of syringe/cartridge designs

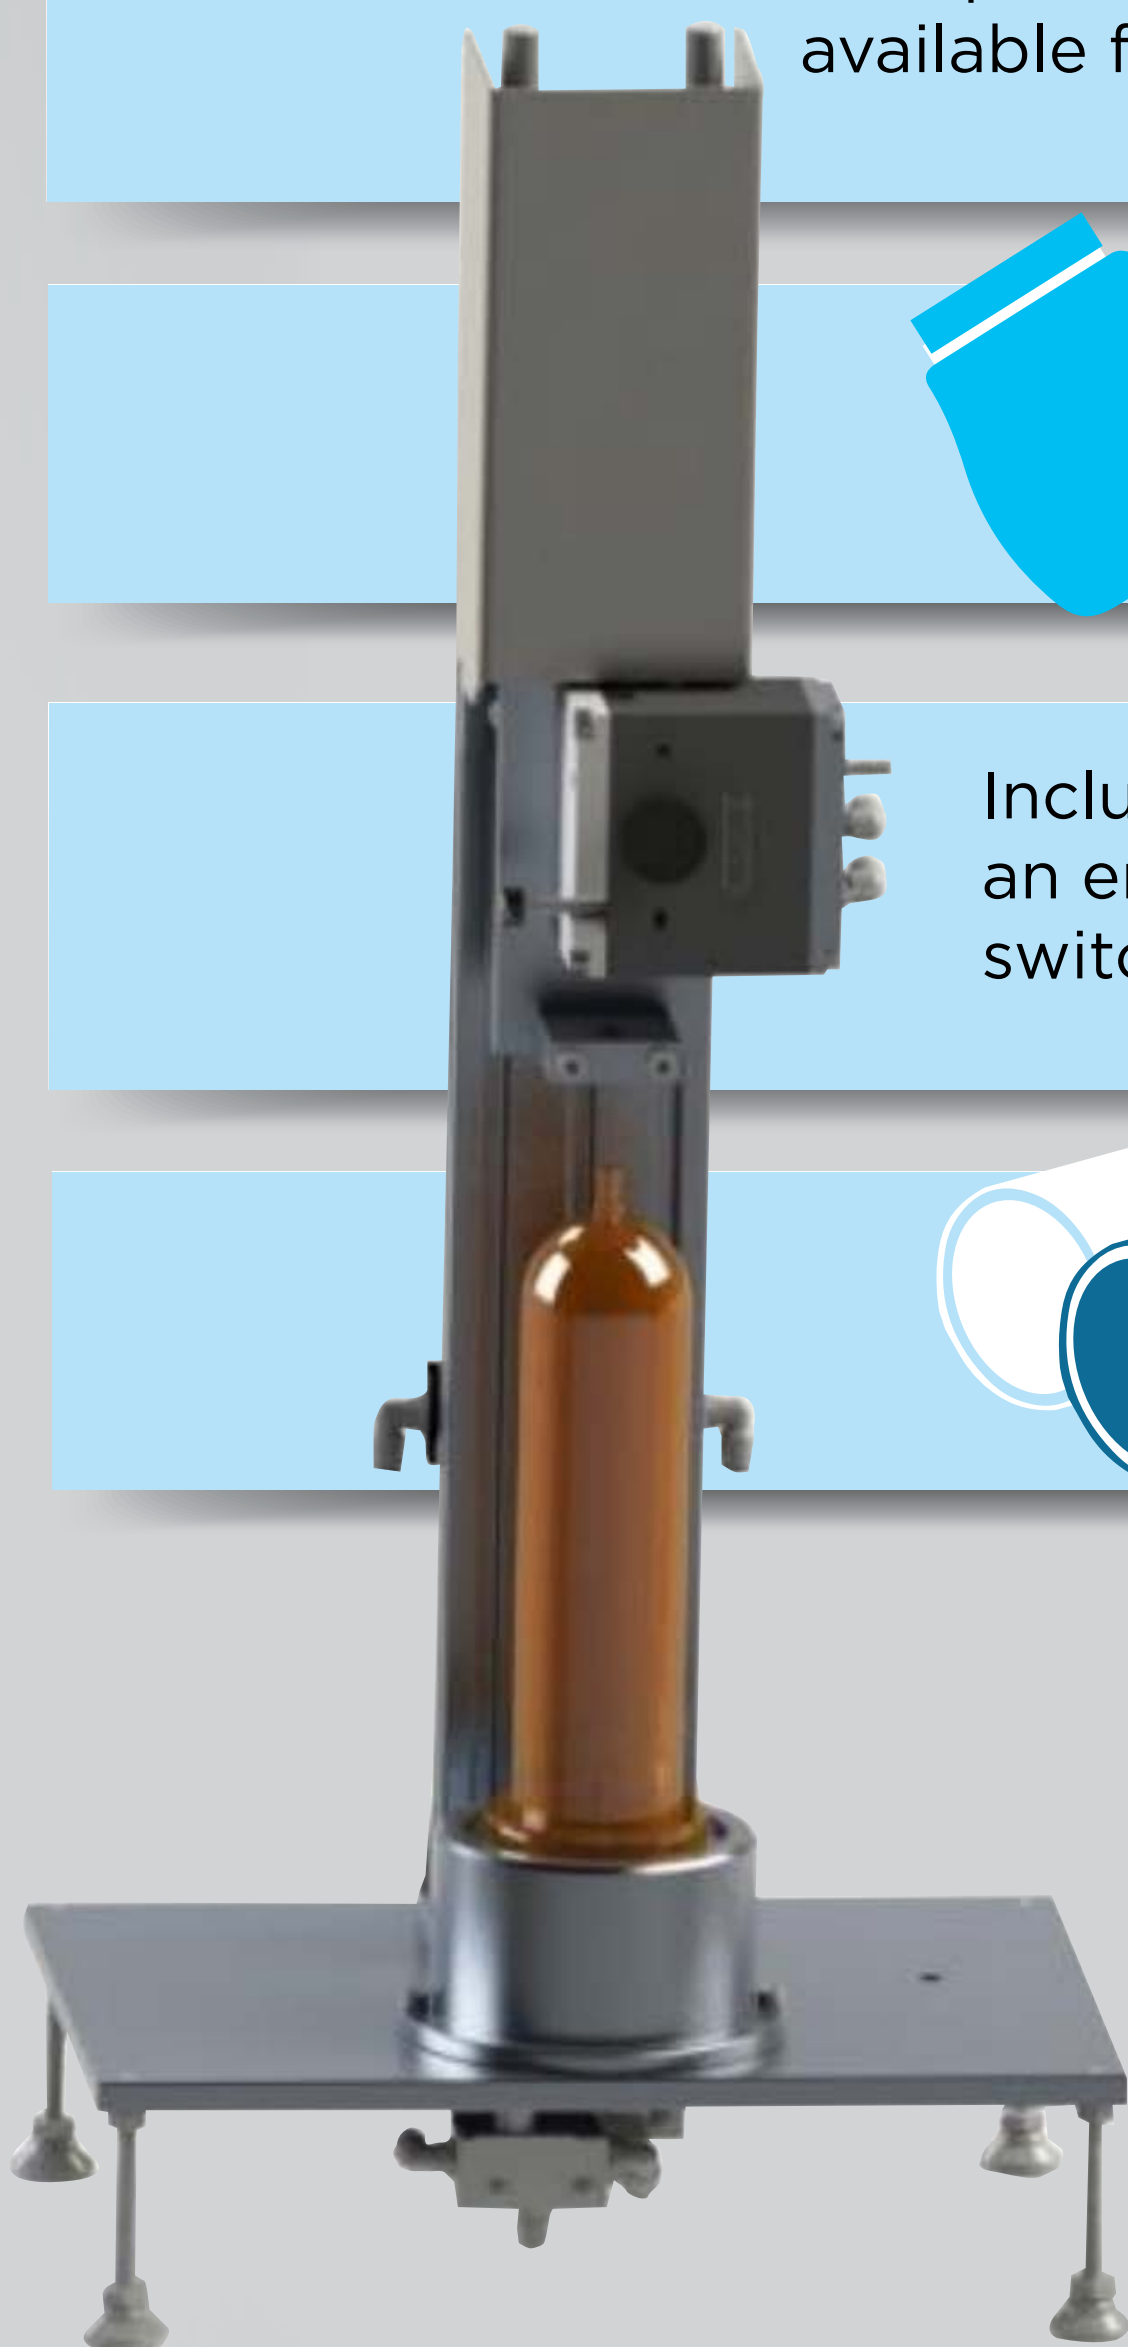

Foot switch for hands-free fill cycle activation

Includes a control panel that incorporates an emergency stop switch, material prime switch, and a cylinder pressure regulator

Available with clear or opaque (black) fluid tubing

Dymax specializes in the manufacture of bench-top and semi-automated systems for filling cartridges and syringes. Our Tridak® filling systems are easy to use and cost effective – offering quick, repeatable filling, and years of trouble-free service.
