

New! Model 1001 Filling System for Single Syringes

Bench-Top Syringe Filler Features Pneumatic Stop & Quick Change System

The new Tridak® Model 1001 syringe filling system is designed to fill syringes, one at a time, quickly and accurately. The system is manually loaded and unloaded, and is operated with the push of a foot switch. The Model 1001 features a pneumatic stop, which potentially allows the user to operate multiple units or complete other tasks while the cycle is running. The system also features a new quick-change clamping mechanism, which makes material changeover faster and easier than ever.

Have You Checked Out Our Infographics Yet?

We are happy to announce the addition of new infographics to our website. These documents provide information on our systems in a fun, graphical way. Make sure to stop by and check out our latest on the [Model 1050 syringe filler](#).

Interested in a Custom Filling System?

While our standard systems are a good fit for many applications, we understand that sometimes something more customized may be needed.

At Dymax, we have the know-how and engineering capabilities to design and manufacture a filling system tailored to your needs. Our systems range from semi- to fully-automated, and integrate features like labeling, weight verification, and other quality checks to increase throughput and improve quality.

If you need a custom system, [set up a time to talk](#) to one of our system integration specialists. The consultation is free with no obligation to buy.

Privacy Policy: We value your interest in Dymax and hope you'll contact us when seeking solutions for your manufacturing assembly challenges. Because of this, we consider your contact information and any other information you provide us as confidential. This means, most importantly, that we do not sell your contact information to anyone. Instead, your information is used by us solely to provide you with the information and assistance you have requested.
