

A Message to Our Customers About COVID-19

During this difficult time, we extend our best wishes to customers and give thanks to everyone providing essential products and services that are keeping the country running. Our facility is currently operating and the team is here to help support your manufacturing needs. We continue to monitor the global situation and have implemented procedures at our facility to comply with local regulations, reduce the potential to spread corona virus, and provide uninterrupted business operations. For details on what precautionary measures we've put in action, [click here](#).

Eliminate Cross Contamination with a Tridak® Filling System

If cross contamination is a concern in your facility, a Tridak filling system can help. Our systems utilize unique disposable fluid path valves to fill syringes and cartridges. This technology eliminates cross-contamination and minimizes clean-up and downtime during product changeover. [Available Systems...](#)

Eliminate Trapped Air and Inconsistent Piston Alignment

Looking to eliminate some of the downfalls associated with manual piston insertion, such as trapping air in the pistons or inconsistent depth and alignment? Then Tridak Model 3200 could be the solution you've been searching for. Insert pistons into syringes and cartridges accurately and quickly with this simple, easy to learn, and low-maintenance unit. [Learn more...](#)

Seeking Distributors/Sales Partners

Tridak is currently seeking distributors/sales partners for our filling product line. Please [contact us](#) if you're interested in selling these products for us.
