

Introducing the Extended Model 2200 Cartridge Filling System

We've redesigned the Model 2200 Cartridge Filling System for those in need of greater height for their filling projects. Now available in a 32" tall "extended" version to accommodate larger cartridges, this system is 6" taller than the standard 26" model. Works with most single and dual barrel cartridges from Sulzer, Semco®, Nordson EFD, Fishman®, Techcon, Plas-Pak® and more.

Dispense High-Viscosity Fluids with Ease

Our new DIY fluid path kit allows users to dispense material through the bottom of a 10 gallon pressure tank instead of the lid, reducing the pressure required to dispense high-viscosity fluids like teeth whitening gels. To learn more or make a purchase, contact Tridak customer service about part number T18770 using the link below.

Find the Right Filling System for Your Project

It can be difficult to determine which filling and packaging system is right for your application. To simplify things, we've created a comprehensive infographic that summarizes the uses and features of each system.
